

APTEAN INDUSTRIAL MANUFACTURING ERP WORKWISE EDITION

EXTENDED PROFILE

Ready for What's Next, Now®

OVERVIEW

Aptean Industrial Manufacturing ERP WorkWise Edition is a suite of software aimed at North American manufacturing and engineering companies.

The software is designed for growing manufacturing firms to streamline operations, improve efficiencies and manage complexity. It is role-based, rather than module-based, meaning users can assemble their own views and don't have to spend time switching between modules for different functionality.

Aptean Industrial Manufacturing ERP WorkWise Edition includes 45 applications that provide a range of functionality essential to manufacturing organizations. These include advanced forecasting, CRP, MRP, and MPS functionality. There is Solidworks CAD integration, inventory and bill of material functionality, and powerful shop floor control tools. There are also financial applications, including costing, cash management, and payroll.

The software can be deployed in the cloud or on-premise and is accessible via native iOS and Android applications.
