

ECOUNT ERP

EXTENDED PROFILE

OVERVIEW

Ecount ERP is a cloud-native, web-based ERP platform for small and midsize businesses worldwide.

FUNCTIONALITY

Ecount focuses on broad, practical business coverage: it includes built-in modules for accounting (AR/AP, financial reporting, multi-currency), inventory and warehouse management (barcode, lot/serial tracking, WMS), sales (quotes, sales orders, invoicing), purchasing (POs, RFQs, MRP), production (BOM, MPS, job orders), payroll and HR, and CRM.

These modules link to real-time dashboards and customizable reports so teams see the current status instantly.

Ecount also provides practical platform features that matter for implementation and security: a mobile app, company messenger, Excel bulk import, an open API for integrations, free onboarding resources, and real-time support, and ISO/IEC 27001 security certification. These features help reduce rollout friction and support secure, cross-department workflows.

ECOUNT PRICING

Ecount's licensing model does not add per-user fees; the system supports unlimited users and role/ID authorization settings.

It also includes free system upgrades and weekly feature updates. This makes the pricing predictable for growing teams. Download the extended software profile for subscription pricing information.
