

STANDARD ACCOUNTS EXTENDED PROFILE

OVERVIEW

Standard Accounts is a system by HansaWorld aimed at small and medium-sized businesses.

The Standard Accounts software is designed for small organizations that want a low-cost, easy-to-set-up solution for invoicing, bookkeeping, and business reporting. With multicurrency and multi-language functionality, it is ideal for companies that operate across borders and deal in different currencies.

The free features include modules for accounts receivable, accounts payable, and a general ledger that comes equipped with drill-down functionality and no time or transaction limits. There is then a wide range of additional premium modules that can be added on as and when required. These include automated accounting, CRM, sales, and inventory modules.

The software can be downloaded from the HansaWorld website but requires version 3.5 of the Microsoft .NET framework to be installed. There are also native applications for iOS and Android mobile devices.

SOFTWARE SCREENSHOTS

The image displays the Standard Accounts software interface across three devices: a laptop, a tablet, and a smartphone. The laptop screen shows the main dashboard with a navigation menu on the left and a 'Welcome to Standard Accounts' message. A window titled 'SACC: Invoices: Browse' is open, displaying a table of invoices.
